

Anza Solar Subscription Packages

For Developers

Anza offers solar developers two data and analytics subscriptions to help them make faster and better investment decisions, gain negotiating power with buyers, and ultimately increase project profit.

If more of your solar development projects are in the early stages, the Essentials package is likely what you need. Once you have projects you want to optimize fully with your module selection, the Pro package is a better solution.

The screenshot displays the Anza web application interface. The top navigation bar includes 'Home', 'Projects', 'Module Library', and 'Market Intelligence'. The main content area is titled 'Sample Project' and shows a table of solar modules with various metrics. Below the table, there is a 'Compare Modules' section that compares three different module options across several key performance indicators.

Module	Price (DDP)	BOS Savings	Production Benefit	Effective \$/W
4	0.230 \$/W	0.011 \$/W	0.020 \$/W	0.200 \$/W
17	0.280 \$/W	0.015 \$/W	0.014 \$/W	0.251 \$/W

	Module 1 (Yellow)	Module 2 (Teal)	Module 3 (Pink)
Price and Value			
Price (DDP)	0.250 \$/W	0.310 \$/W	0.280 \$/W
BOS Savings	0.009 \$/W	0.004 \$/W	0.015 \$/W
Production Benefit	0.007 \$/W	0.046 \$/W	0.014 \$/W
Effective \$/W	0.234 \$/W	0.260 \$/W	0.251 \$/W
NPV Delta	\$257,631	-\$8,961	\$72,626
Anza Risk Rating			
UFLPA Risk	Medium	Lowest	Medium

Anza Solar Subscription Packages

For Developers

		Essentials	Pro
Market-wide view	Compare modules from 35+ vendors and 155+ products		
	Access list pricing for 95% of U.S. module supply		
Current pricing	See historic & forward-looking visualizations from suppliers across ten delivery quarters showing minimum and median \$/Watt pricing filterable by segment (i.e. cell type, Tier, trade risk, & U.S. manufacturing, & delivery date)		
	Download the latest technical documents easily (e.g., PAN files, data sheets, LID, IAM, etc.)		
Extensive up-to-date data	Find a module that meets your specific criteria using technical, trade risk, and domestic content data filters		
	Reduce risk by filtering module options using counterparty and contract term data and advanced technical filters		
	Compare install costs and production for 155+ products to buy based on value, not just price		
One of a kind technology	Rank product options by total value, purchase price, BOS savings, or production benefit to maximize project profit		
	Tailor optimization to your project specs (e.g., custom module price, location, PPA rate and term, discount rate, etc.) to improve returns
